## DETAILED ACTION

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-24 and 36-39, drawn to a plug, classified in class 439, subclass 660.
- II. Claims 25-35 and 40-43, drawn to a memory card/information storage device, classified in class 361, subclass 684.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination does not recite the particular features of the plug. The subcombination has separate utility such as use in other connecting devices apart from a memory card/information storage device.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction

is required, as indicated in proper

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
